Topic: Biological Resources - Marine

Comments: I am a lover of California's natural resources and wildlife. Any new development has the potential to harm marine life in the water and wildlife on land, no matter where the development. Marine wildlife concerns are well addressed by BHP Billiton. However, even more impressive is the fact that they take time to consider the impact on California's wildlife on land even though the project is several miles out to sea. This project should be supported.
